# BARANI A

Software Engineer | Full Stack Developer | Java Backend Developer

+91 9489315805 | jayambarani27@gmail.com | Bangalore, India| GitHub: Barani23M | LinkedIn: Barani A

## OBJECTIVE

Motivated Computer Science Engineering fresher (2026) seeking a Full Stack Developer opportunity to apply Java, JavaScript, React, Spring Boot, and SQL skills in developing scalable web applications while continuously enhancing technical expertise and contributing effectively to a collaborative development team.

## TECHNICAL SKILLS

**Languages:** Java, JavaScript, Python, SQL
**Core Concepts:** OOPs, DSA, SDLC, API Integration, Version Control, Problem Solving
**Web & Frontend:** HTML, CSS, React
**Backend:** Spring Boot, REST APIs
**Database:** MySQL, SQLite, Supabase
**Cloud & OS:** AWS, Linux
**Tools:** Git, GitHub, Postman, AI Tools & AI Agents

## EDUCATION

**B.E – Computer Science & Engineering** *2022 – 2026*
Excel Engineering College, Namakkal, Tamil Nadu | CGPA: 7.95

**Higher Secondary (Class XII)** *2021 – 2022*
Vaagai Vidhiyalaya Matric Hr Sec School, H.Pudupatti, Dharmapuri | 81%

**SSLC (Class X)** *2019 – 2020*
Vaagai Vidhiyalaya Matric Hr Sec School, H.Pudupatti, Dharmapuri | 96%

## INTERNSHIP EXPERIENCE

**Java Full Stack Intern — Beasant Technologies, BTM, Bangalore** *Jul 2026*

- • Currently pursuing a Java Full Stack Development internship covering Core Java, Spring Boot, React, SQL, REST APIs, and Data Structures & Algorithms (DSA).
- Engineered full-stack applications by building 10+ REST API endpoints, integrating MySQL databases, and implementing responsive user interfaces using React.
- Applied OOP principles, Git & GitHub for version control, Postman for API testing, and gained hands-on experience with Linux and AWS cloud fundamentals.

**Software Development Intern — NXTLOGIC** *30 Days*

- Designed and maintained 10+ REST API endpoints for backend services in a live production environment using Agile SDLC practices.
- Optimized SQL database operations — schema design, CRUD queries, and query performance tuning across multiple modules.
- Tested 15+ API endpoints using Postman; applied OOPs principles and contributed to API documentation.

## PROJECTS

**Anti-Drug Assistant Web Application** *Python · Flask · MySQL · REST API*

- Engineered a production-grade full-stack application using Python (Flask) with SQLite/MySQL as the database layer.
- Designed and documented 10+ REST API endpoints for user authentication and core workflows using Swagger and Postman.
- Integrated an AI-assisted chatbot for user interaction; applied OOPs principles for modular backend architecture.

**Pregnancy & Baby Care Assistant** *Java · Spring Boot · React · SQL*

- Engineered backend services using Java (Spring Boot) with OOPs-based design and REST API integration across 8+ modules with SQL.
- Implemented responsive React UI components for maternal and newborn health tracking with real-time data flow.
- Automated vaccination reminder workflows and unique child ID generation; deployed digital health records management features.

## ACHIEVEMENTS & CERTIFICATIONS

- Winner – AppViewX Payoda Hackathon: Engineered scalable AI-powered full-stack prototype using React, Flask, REST APIs & SQL.
- Udemy: Programming in Java , Programming in JavaScript
- GUVI: JavaScript & Python , Paper Presentation in Java – Knowledge Institute of Technology
- Workshops Completed: Web Development, Power BI, AI & Machine Learning, Java

## SOFT SKILLS & INTERESTS

**Soft Skills:** Problem-Solving • Team Collaboration • Adaptability • Quick Learning • Ownership Mindset • Team Player
**Interests:** Software Engineering • Backend Development • Software Testing & QA • Cloud Engineering • Flutter
