OBJECTIVE

Motivated Computer Science Engineering graduate (2026) seeking a Software Engineer / Java Full Stack Developer role where I can apply my knowledge of Java, Spring Boot, React.js, Node.js, SQL, and MySQL while developing scalable web applications and strengthening my software engineering skills.

TECHNICAL SKILLS

Languages: Java, JavaScript, SQL
Core Concepts: OOPs, SDLC, API Integration, Version Control, Problem Solving, DSA(Basic)
Web & Frontend: HTML, CSS, React.js
Backend: Spring Boot(basic),Node.js, REST APIs
Database: MySQL, SQLite, Supabase
Cloud & OS: AWS, Linux(Basic)
Tools: Git, GitHub,IntelliJ, AI Tools & AI Agents

EDUCATION

B.E – Computer Science & Engineering *2022 – 2026*
Excel Engineering College, Namakkal, Tamil Nadu | CGPA: 7.95

Higher Secondary (Class XII) *2021 – 2022*
Vaagai Vidhiyalaya Matric Hr Sec School, H.Pudupatti, Dharmapuri | 81%

SSLC (Class X) *2019 – 2020*
Vaagai Vidhiyalaya Matric Hr Sec School, H.Pudupatti, Dharmapuri | 96%

INTERNSHIP EXPERIENCE

Java Full Stack Intern — Besant Technologies, BTM, Bangalore *Jul 2026 -Present*

- Currently pursuing a Java Full Stack Development internship covering Core Java, Spring Boot, React, SQL, REST APIs, and Data Structures & Algorithms (DSA).
- Engineered full-stack applications by building 10+ REST API endpoints, integrating MySQL databases, and implementing responsive user interfaces using React.
- Applied OOP principles, Git & GitHub for version control, Postman for API testing, and gained hands-on experience with Linux and AWS cloud fundamentals.

PROJECTS

Online Women Safety Platform Node.js · React · MySQL

• Developed a **full-stack web application** using **Node.js, React.js, and MySQL**, implementing backend services and responsive frontend components.

• Built **REST APIs** using **Node.js** and integrated **MySQL** for database management, including **CRUD operations, data handling, and backend integration**.

• Applied **JavaScript and React.js** concepts to develop modular and responsive user interfaces, integrating frontend components with backend services for women safety and emergency assistance features.

Pregnancy & Baby Care Assistant *Java · Spring Boot · React · SQL*

• Engineered **backend services** using **Java and Spring Boot**, applying **Object-Oriented Programming (OOP)** principles and developing **REST APIs** across multiple application modules with **SQL/MySQL** database integration.

• Developed **responsive React.js UI components** for maternal and newborn health tracking, integrating frontend components with backend services and database-driven data.

• Implemented **vaccination reminder workflows, unique child ID generation, and digital health record management**, contributing to end-to-end **full-stack application development**.

ACHIEVEMENTS & CERTIFICATIONS

- Winner – AppViewX Payoda Hackathon: Engineered a scalable full-stack application using **Java, Spring Boot, React.js, REST APIs, and MySQL**, implementing robust backend services and responsive user interfaces.
- Udemy: Programming in Java , Programming in JavaScript
- GUVI: JavaScript & Python , Paper Presentation in Java – Knowledge Institute of Technology
- Workshops Completed: Web Development, Power BI, AI & Machine Learning, Java

SOFT SKILLS & INTERESTS

Soft Skills: Problem-Solving • Team Collaboration • Adaptability • Quick Learning • Ownership Mindset • Team Player
Interests: Software Engineering • Backend Development • Software Testing & QA • Cloud Engineering • Flutter
Declaration: I hereby declare that the information provided in my resume and application is true and accurate to the best of my knowledge.
